#### Report of Health Officer

The town has experienced the worst epidemic in its history. I refer to the fatal influenza, which has caused 30 or more deaths, and I tender my thanks to all who responded to the call for aid to stamp it out; and especially do I thank he members of the Red Cross who worked so faithfully to relieve the suffering. Also, W. B. Evans and F. A. Stratton, who were not mentioned in the local paper, who rendered valuable assistance and refused any recompense. There are serious questions before the town, to be solved in the future, in regard to sewerage; some streets in our village need it badly to make the town sanitary.

Thanking all for their co-operation.

HARLON F. HODGE
Health Officer.

## Report of Superintendent of Schools

TO THE SCHOOL BOARD OF JAFFREY:

I herewith submit to you my first annual report, the tenth under district supervision. This report will be limited to recording certain things which ought to find a place in every

school report and to making a few specific suggestions.

We have attempted at the outset to rectify certain conditions that demanded immediate attention. The many changes in the high school teaching force last year could not help having a demoralizing effect upon both attendance and scholarship. The enormous number of tardy marks for the year, 482 in the high school alone caused the State Department to place the school on probation until December 31, 1918. That this matter has been successfully dealt with is shown by the fact that only 22 tardinesses were recorded during the first term, and the State Superintendent not only removed the ban but con-

gratulated the school on its excellent showing.

The congestion in the grades has been one o'our big problems. It has caused pupils to be promoted year after year who were not fitted to advance. The climax seemed to be reached in September when the sixth grade enrolled 61 pupils in a room seating only 42. After the schools re-opened in October this grade was divided and the results have already justified the change. The next pressing need was to relieve the congestion in grades one and two, which had enrolled 58 and 52 pupils, respectively. We have taken 15 pupils from each grade and placed them in charge of a new teacher in the Union Hall building. We believe this change will show equally good results. By closing the school in District No. 3 last year and District No. 7 in October, where only four pupils appeared after the closing on account of the influenza, we are employing no more teachers than formerly and are getting better results.

The next pressing need is that of developing grades seven and eight into a real junior high school. Last year the interests of these pupils was considered only after the high school proper had been attended to. With such important subjects as English and spelling being given only once a week it is not strange that these pupils have been coming into the high school poorly prepared. This schedule has been revised; the numerous study periods, which had become loafing periods, have been reduced. The employment of Miss Gens in the new division of the sixth grade has allowed her to take some of the subjects in these grades and thus relieve the high school teachers a little.

In order to do justice to these grades I would recommend the employment of a new teacher to take charge of the seventh grade room, and have general charge of the junior high school department. This will be absolutely necessary another year if the Commercial and Domestic Arts courses are continued, and in order to give the junior high school pupils their proper share of attention I would recommend the employment of this new teacher to begin with the spring term.

Despite the unfortunate interruption of our schools by the epidemic of influenza the high school has shown encouraging

results, and the work is now well up to the standard.

Noon lunches have been served by the Domestic Arts depart-

ment since October, which have proved very popular.

Throughout the grades we have been very fortunate in the teachers we have been able to secure. We greatly regret that Mrs. Duncan was obliged, on account of sickness, to resign her position.

Our rural schools are small, but the work done in them is of

a good quality and the pupils are making progress.

I would recommend continuing the three courses now offered in the high school, the development of the seventh and eighth grades into an efficiency working junior high school by placing a special teacher in charge of this department, continuing the departmental work by the regular high school teachers so far as is possible without detracting from the high school courses which they are primarily employed to teach, the proper development of the high school reference library and the securing of the needed equipment in the physics and chemistry laboratories.

Following the earnest recommendation of the Committee on Americanization the evening school has been in session two nights a week since early in November. With Mr. Parker as principal and Miss Kelly and Miss LaRiviere as assistants, the work has been faithfully looked after, and encouraging results have followed, although we had hoped for a much larger class in beginners' English. The total enrollment has been 51.

I wish to thank the citizens for the support they have given me, the school board for their help and co-operation, and the teachers for their loyalty and good will. It is only as we all

work together that the best results can be obtained.

Respectfully submitted,
Lewis S. Record,
Superintendent of Schools.

East Jaffrey, N. H., Jan. 31, 1919.

## Report of the School Nurse

To the Superintendent of Schools:

The influenza epidemic delayed the examination of school children so that it is rather late in the school year, finishing the last of January work that should have been done in November.

The overcrowding of the first two grades has been partly relieved by opening another room in the old brick building, the children of this new room using the basement of the wooden building. Along other sanitary lines I wish we might do better.

In the District schools are the children of the farmers mostly. They come to school clean and well nourished, and seem about

the average mentally.

In the village schools most of the children are of foreign parentage. I cannot say that some of them are mentally deficient, but they are away behind their grades in age and mentality. Some children fourteen and fifteen years of age being only in the fourth and fifth grades, where normally they

should be entering high school.

This year I have tried for cleanliness, furnishing tooth brushes to children for ten cents, or giving them if they could not afford that amount. They have all been inspected for pediculosis, and only three cases were found. Children with dirty heads were sent home to have them washed, as dirt is a breeding place. Each morning, if possible, the first three grades are inspected for clean teeth, hands and nails. Where law, order and cleanliness mean so much for the morale of the army, it should certainly work in civil life. And if parents do not take enough interest in their own children to send them to school clean, why should they expect any more from a teacher than what they are paid for giving.

The other subjects I should like to take up are tonsils, adnoids, and children going to moving pictures at night, which is against

all laws of school hygiene

I wish to thank the school board, the teachers, and Father Hennon for their kindly interest and willingness to help.

> Marie L. Hiller, School Nurse.
